IN THE CLAIMS

Please amend claims 1, 7, 9, 12-15, 21, and 23 as follows:

1. (Amended) A method comprising:

calling a scheduling driver to start an Input/Output (I/O) request to a device [for an application];

determining if the device is busy; and

if the device is not busy,

providing an estimated processing time (EPT) for the I/O request to be completed [for the application].

7. (Amended) The method of claim 5, further comprising, providing the I/O

operation results from the I/O request [to the application] if the I/O request has been completed.

9. (Amended) The method of claim 5, further comprising, calculating an estimated processing time remaining (EPTR) for the I/O request to be completed, if the I/O request has not been completed, and providing the estimated processing time remaining (EPTR) [to the application]

12. (Amended) The method of claim 1, further comprising calculating an estimated amount of time left (EATL) until the device will be available [to the application] if the device is busy, and providing the estimated amount of time left (EATL) [to the application].

13. (Amended) The method of claim 12, further comprising:

2 sleeping for the estimated amount of time left (EATL);

3 calling the scheduling driver to start the I/O request to the device [for the application]

4 after sleeping for the estimated amount of time left (EATL); and

5 determining if the device is still busy.

1 14. (Amended) The method of claim 13, further comprising:

2 determining if the device is still busy and calculating the estimated amount of time left

3 (EATL) until the device will be available, if the device is still busy;

4 sleeping for the estimated amount of time left (EATL);

5 calling the scheduling driver to start the I/O request to the device [for the application],

6 after sleeping for the estimated amount of time left (EATL); and

7 if the I/O request has not been started,

8 repetetively performing the above operations until the I/O request has been started.

1 15. (Amended) A machine-readable medium having stored thereon instructions,
2 which when executed by a machine, causes the machine to perform operations comprising:

3 calling a scheduling driver to start an Input/Output (I/O) request to a device [for the
4 application];

5 determining if the device is busy; and

6 if the device is not busy,

7 providing an estimated processing time (EPT) for the I/O request to be completed [for the
8 application].

AS
Sub 27
1 21. (Amended) The machine-readable medium of claim 19, further comprising the
2 operation of providing the I/O operation results from the I/O request [to the application] if the I/O
3 request has been completed.

AS
Sub 27
1 23. (Amended) The machine-readable medium of claim 19, further comprising the
2 operations of calculating an estimated processing time remaining (EPTR) for the I/O request to
3 be completed, if the I/O request has not been completed, and providing the estimated processing
4 time remaining (EPTR) [to the application].

Sub 27
1 26. (Amended) The machine-readable medium of claim 15, further comprising the
2 operations of calculating an estimated amount of time left (EATL) until the device will be
3 available [to the application] if the device is busy, and providing the estimated amount of time
4 left (EATL) [to the application].

1 27. (Amended) The machine-readable medium of claim 26, further comprising the
2 operations of:
3 sleeping for the estimated amount of time left (EATL);
4 calling the scheduling driver to start the I/O request to the device [for the application]
5 after sleeping for the estimated amount of time left (EATL); and
6 determining if the device is still busy.

1 28. (Amended) The machine-readable medium of claim 27, further comprising
2 performing the operations of:
3 determining if the device is still busy and calculating the estimated amount of time left
4 (EATL) until the device will be available, if the device is still busy;

AM 5
cont
6 sleeping for the estimated amount of time left (EATL);

calling the scheduling driver to start the I/O request to the device [for the application],

7 after sleeping for the estimated amount of time left (EATL); and

if the I/O request has not been started,

8
Sub 9 repetetively performing the above operations until the I/O request has been started.

CONCLUSION

Please enter the amendments for the following claims: 1, 7, 9, 12-15, 21, 23, and 26-28.

Applicant's undersigned attorney may be reached at our Costa Mesa office by telephone at (714) 557-3800. All correspondence should continue to be directed to our below-listed address.

Respectfully submitted,

BLAKELY, SOKOLOFF, TAYLOR & ZAFMAN
